How much Co2 emissions

Everyone is talking about Co2 emissions.
How much does a car emit? How much does a plastic glass emit?

Well, we did the Co2 emissions on our glasses, and for our All-a glass, its 0,9 kilo Co2 - over a 5 year time. Or the same as a petrol car is using driving 5 kilometers.

We have done the Co2 emissions on a wide range of our glasses, please ask us, if you need them.

The total estimated climate emission

0,9 kg CO₂-e

Potential impact of missing data
Best case: 0,89 Kg CO₂-e -3%
Worst case: 1,2 Kg CO₂-e 31%

Total climate impact
0,9
KG CO₂-e

This Climate emission is the approximate equivalent of:

Average Car
4
Kilometres

Red steak
0
Per 300 gram red steak
