**Pssst... Do you dream of a  
German October party?**

[Check out our festive assortment of beer mugs right here:](#)

## **Did you know that in Munich, over seven million liters of beer are served during the 16 days of Oktober party each year in October?**

With thoughts of long rows of brown table-benches, busty women in dresses carrying eight large beer mugs, men in lederhosen, festivities, colors, and German Schlager hits played by a massive brass band, GlassFORever now presents a large catalog of reusable beer glasses and mugs.

All our beer glasses and mugs are practical and come with or without handles. They have excellent insulation properties, so they don't absorb cold or heat.

It's always a great advantage for the beer to stay cold for a long time.

# Is there anything worse than a lukewarm beer?

Besides a vacation to a Spanish island in rainy weather, at a hotel with no internet connection, we find it very hard to think of anything worse.

Check out our festive assortment of beer mugs right here:

The glasses can withstand up to 2000 dishwasher cycles, and you can safely bring out multiple toasts while you are listening to the German schlager hits without them breaking or cracking. They are made of 100% recyclable, durable, sustainable plastic.

When you've worn out your GlassFORever products after many years of use, they don't belong in the trash. Instead, we collect and transport them to our Danish factory, where they are ground up and made into new environmentally friendly products. That's our recycling system.

**Do you want to win the competition in responsibility and offer your customers a sustainable alternative to regular glass?**

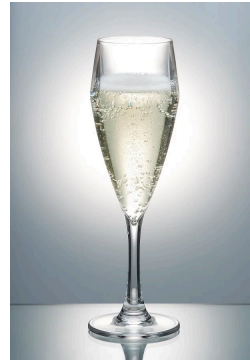

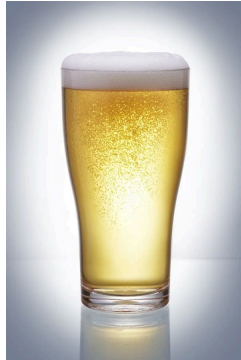

Create joy and celebration with beer mugs from GlassFORever.
